

KARDS

HELLO, WORLD!
Christopher Robison.

AWARD-WINNING TECHNOLOGY LEADER

MORE ABOUT ME ▾

ABOUT

Let me introduce myself.

Skilled technology leader excelling in the rapid development of solutions to manage complex technical environments for growing companies, ranging from startups to billion dollar industry leaders. With over 20 years experience in the industry, I can build, develop and lead high-performance technical teams and effectively manage people and resources in-person and remotely across multiple geographic locations. My extensive experience allows me to leverage my business acumen and technical expertise to translate a technology needs into innovative solutions and actionable plans. Hands-on but I know how to delegate. I am just as comfortable managing people and engineering resources as I am hacking away at code. tl;dr: I build things that make companies go.

Work Experience

Chief Technology Officer

Feb 2020 – Dec 2020

D. Harris Tours, Inc.

D Harris Tours is a shuttle bus transportation company which offers 22-44 passenger buses for hire. The majority of their business is derived from schools (student event transportation) and local tours. 10 years ago, I developed and implemented software that allowed D Harris to grow from 2 buses to 12. But the system I implemented 10 years ago was not made for the increased number of drivers, buses, customers and trips the company had grown to serve. Hired as CTO where I updated and enhanced their systems with modern tools to better manage the growing company; real-time bus data, automated maintenance notifications, automated trip confirmations and notifications via email and SMS and more. After reviewing the first months trip data, I found that drivers would often sit idle for 4-5 hours, waiting to pickup students they had dropped off at a football game or band practice. I developed an algorithm to identify these idle times and match them with jobs. I offered drivers an extra hours pay if they did the extra trip. This nearly doubled the daily revenue until the COVID-19 shutdown.

Manager, Software Engineering

Jul 2010 – Feb 2020

Conversant, Inc. (formerly Mediaplex)

Working at the same company for 10 years presented many challenges. I wore many hats and performed many roles all while the company changed names and was bought and sold twice. By the time my team was cut due to COVID-19, we were responsible for designing, developing and maintaining the infrastructure and code-base that serves many millions of mobile and rich media ads each day.

Mediaplex was an online advertising company that was started in 1999 and in 2001 acquired by ValueClick. The servers and software that ran the ad serving platform was over a decade old and the stack was beginning to show its age. The surge in popularity of "Rich Media" ads that began hitting the market in 2009 was beyond what their backend had been engineered to handle. Competing ad vendors who could serve these new rich media ads began stealing away valuable business, costing the company revenue and customers. I was hired to lead their Rich Media effort and help modernize their ad serving infrastructure and metric collection.

I was responsible for designing and implementing a RESTful API for serving rich media ads and building out scalable backend services to handle integration with existing servers and infrastructure.

A large part of Rich Media ad serving and reporting is performed in the client and this required creating a small, reliable, cross-browser client-side ad loading framework that worked in tandem with the new backend API. After stabilizing the infrastructure, Managed engineering resources to work with product services team to ensure the successful deployment of all Rich Media ad campaigns. These enhancements were a great success by all counts; increasing revenue by \$1.2 million in the first year alone.

By the time Rich Media ad serving was running smoothly, demand for mobile ads was steadily increasing. My team was tasked with implementing a mobile ad solution. Our company joined the IAB [<https://iab.com>], a consortium of online advertising companies that develops industry standards on my recommendation. As a participating IAB member, we were instrumental in helping to define the updated MRAID 2.0 standard for serving mobile ads. The MRAID protocol is still currently in use and the defacto standard for mobile ad serving. I wrote the initial Conversant Mobile Ad MRAID SDK's for both iOS and Android as well test apps for both platforms to be used internally and by our customers to preview ads in a mobile environment before deployment. Infrastructure

Web Architect

Sep 2007 – Jul 2010

Mindjet

Hired to migrate the Mindjet website from PHP to an ASP.Net solution, my role quickly grew into heading up Mindjet's foray into the Software as a Service (SaaS) arena-- Mindjet Catalyst.

Mindjet Catalyst was a web-based mindmapping software that allowed browser-based real-time multi-person sharing, collaborating and editing of mindmaps. The Catalyst client canvas was originally written in Flash and my team was responsible for porting the Flash app to a more standards-based implementation utilizing HTML canvas and Javascript. The new application was designed to utilize open standards with HTML5, CSS3, Javascript, canvas and SVG with few to zero dependancies on external 3rd party libraries.

CEO / Founder

Apr 2006 – Sep 2007

Simple Software, Inc.

Contracted software development and consulting. Provided contract support for previous work positions (Interactivate), developed the Simple Software Application Platform that provided content management systems and business process management applications to small to mid-sized businesses. Customers included Peterson-Dean Roofing, Interactivate, Genetic Savings & Clone, Symantec and more.

VP Engineering

Jun 2004 – Apr 2006

Genetic Savings & Clone

Genetic Savings & Clone was a genetic services company that offered commercial pet gene banking and cloning. Working here was a lot of fun as it gave me the opportunity to apply my technical and management skills to the genetic sciences industry. I was responsible for architecting, developing and deploying Clonesoft, custom business process automation software that ran every aspect of the business from the website to cloned pet delivery. My team managed and integrated diverse genetic equipment such as PCR machines and genetic analysers into our network while securely providing real-time data to internal and client facing

applications. Developed a unique application for viewing real-time business operations with high-level overview drilling down into details in an animated, interactive map. Automated business processes pushed customer orders through the pipeline from biobox to clone. During the course of researching, integrating and automating business processes, I had the unique experience of cloning a cat, Lil' Nicky, from start to finish.

Technical Director

Dec 2001 – Jun 2004

Inter@ctivate, Inc.

As Technical Director for Interactivate, Inc., my responsibilities were extensive and included, but were not limited to managing and maintaining IT resources including customer applications and websites. Help grow the company from 10 to 65 employees.

Software Architect / Technical Director

May 2000 – Nov 2001

TheFinancialCafe.Com

TheFinancialCafe.Com was an Online Financial Broker/Dealer which provides free online market orders. Hired to build a custom CRM application for their support staff, the application quickly grew to encompass every aspect of the company from CRM to billing to handling email, managing the company website and integration with 3rd party financial services.

Senior Web Developer / Administrator

Mar 1998 – May 2000

Food.Com

Food.Com was an nationwide online food ordering and delivery service. Responsible for architecting and development of the online ordering application and the processes and procedures for delivering customer orders to restaurants via various notification mechanisms including IVR phone calls, faxes and custom terminals.

Web Engineer

May 1996 – Mar 1998

Slip.Net

Slip.Net was one of the earliest Internet Service Providers in the San Francisco Bay Area with a client base of over 50,000 users. My roles and responsibilities were divided between system administration and web application development. As the 'Web Administrator', I was responsible for shared administration of our server farm of 30+ servers. I was responsible for all web-based software, E-commerce, network accessible databases, secure

server certificates, web server maintenance, and more. In addition to these administration duties, I was also given a myriad of development projects, including the renovation of the existing system of disassociated and unwieldy collection of flat text db files and dbm's that constituted their 'client database'. I developed an easy to use and coherent system of procedures, tools, scripts, and interfaces using the new 'MySQL' open source database engine and Perl.

Founder / Chief Developer

May 1995 – May 1996

The NetOASIS Software Co.

As founder and President of the NetOASIS Software Co. I was responsible for every aspect of running the business from graphic design to programming to market research and client solicitation. The primary focus of the company was development of web based applications and the integration of a clients systems into a computer based environment. We also offered freelance programming services, web hosting, web site design and maintenance, and setup and installation of intranet hardware and software components. Specialized in online commerce systems and I have installed, upgraded and maintained online payment servers by Cybercash, First Virtual, and Verisign.

Web Developer / Systems Administrator

Jan 1994 – May 1995

True World Access, Inc.

System Administrator/Programmer for a network of mixed SunOS/Solaris/NT servers. Also head of programming staff. Responsible for maintenance of all network hosts, virtually hosted web, email, ftp, and gopher services. Maintained server statistics, CGI scripts and eventually developed online retail software that is used for dozens of web catalogs. Other job functions included working directly with clients during development of their software and site, designing of graphics and layout of web sites, implementing new and emerging technologies on clients sites, and handling some customer technical support issues.

Volunteer Work

Esteemed Leading Knight / House

San Francisco Elks Lodge #3

As Leading Knight and House Committee Chair I was responsible

Committee Chair

Apr 2010 – Apr 2011

for the day-to-day operations of the Lodge restaurant and bar as well as organizing and holding events to raise money for local underprivileged children. During my tenure as House Committee Chair, with the help of the SFPD, we were able to build 100 bicycles to give as Christmas presents to children which were very well received. We raised over \$34,000 for the children in that year.
